PRODUCT UPDATES

TARGETTI USA

New Products

Targetti

sixteen5hundred is pleased to announce the addition of Targetti USA to our linecard!

Targetti offers a wide range of indoor and outdoor architectural lighting and creative solutions crafted with Italian quality and craftsmanship for the U.S. market.

ZEDGE (pictured) is the Targetti LED step marker with a minimal design and compact size (2.5"x2.5"). Available with three "trims plates" that deliver three distinct light effects, ZEDGE's versatility extends to a full palette of architectural colors and finishes that serve both indoor and outdoor architectural applications.

Renna by Peerless

Peerless® Renna™ is more than just a luminaire, it's a lighting solution that combines the features that matter most to you: visual comfort, greater control, sleek design and easy installation, all in a cost-effective solution. Position Renna as a statement piece with various transition pieces that stand out in a design, or keep it simple with a linear run. Renna is also available with a wall wash distribution.

Renna is also the first product to feature the new Modulus™ technology. Modulus simplifies installation with one power drop for up to 32 feet of luminaires, reducing labor cost and troubleshooting woes for everyone.

New Products

Cliff by Eureka

Ideal for illuminating exterior facades, entrances, yards and terraces while adding a modern edge, Cliff is a minimalist wall mounted luminaire that enables multiple design options in the same compact package.

Available in single or dual light direction, Cliff can be arranged to create different lighting patterns to meet aesthetic or functional needs of a space.

The luminaire can be installed in two different vertical orientations, encouraging designers to play with the luminaire silhouette to create a composition. Cliff is built to withstand the elements: it is IP65 and UL WET rated.

SPANL by Lithonia

The award-winning, highly anticipated 3D LED flat panel from Lithonia Lighting® is finally available!

Precise engineering and proprietary materials collide with never-before seen optics to reveal the highest quality specification grade panel from Lithonia Lighting®.

New Products

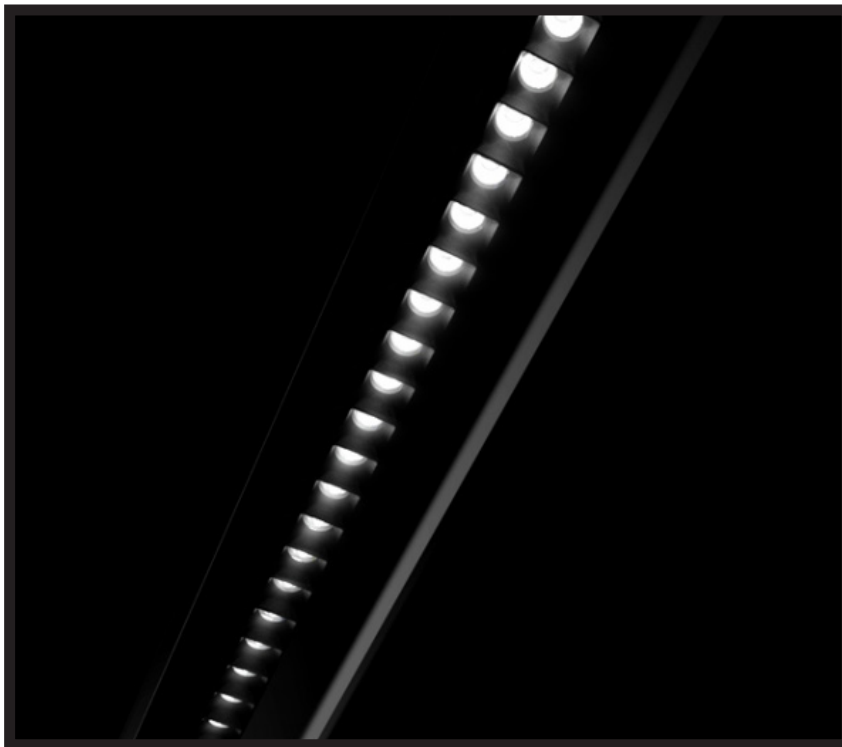

BioPro by Prudential

Future-forward optical engineering for lens-centric control like never before.

— A complete family of apertures; 2" - 3" - 4" - 5" with optics centric design leveraging breakthrough technology in controlling and shaping light with our NEW TruBeam™ optics.

— The most current LED platforms and latest in material science all combine to offer more, including the 'ideal' batwing distribution with low glare (UGR), greater lumen output, higher lumens per watt performance, and a continuous seamless lens, with NO LIGHT LEAK, anywhere.

APEX by A Light

Apex is a powerful ambient lighting fixture that uses a precise viewing cut-off angle and recessed cell-lens technology to maintain a discrete and minimal presence. Pairing high-power LED technology with a compact optical system to carefully control and channel the light source, delivering a unique powerful lighting experience. Apex is comprised of single cells combined to create a linear system. Like a beehive, each cell is a powerful and precise element that when joined together creates one powerful unit.
