PRODUCT UPDATES

CYCLE BY EUREKA

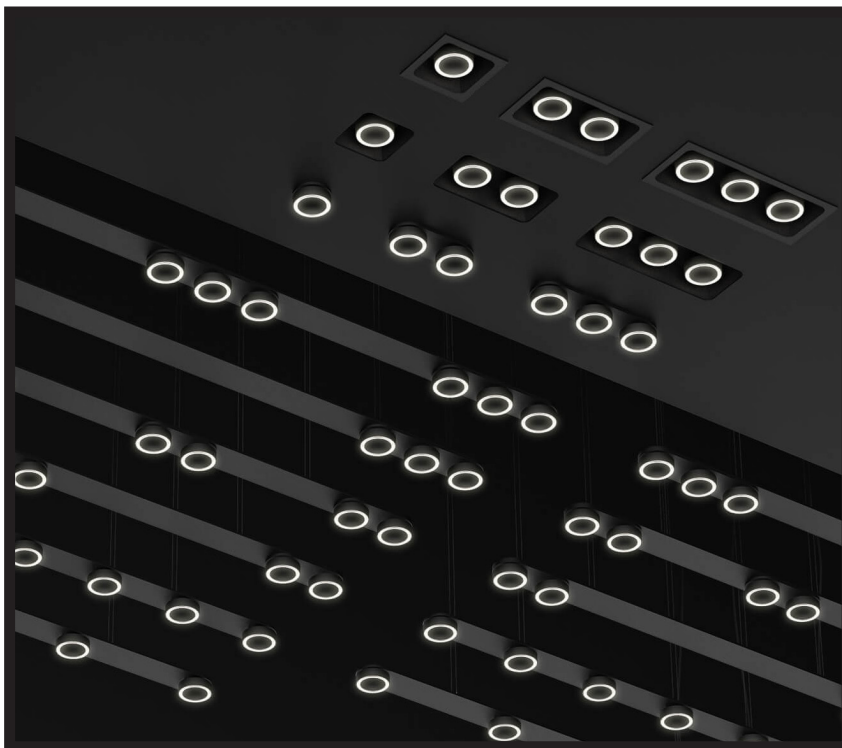

New Products

Soraa

sixteen5hundred is pleased to announce the addition of Soraa to our linecard!

Since 2008, Soraa has delivered a unique LED lighting experience with the singular purpose of leading the world in superior lighting products where color matters: high-end retail, world-class art museums, premium restaurants and hotels. Pioneering LEDs built from pure gallium nitride substrates (GaN on GaN™), Soraa full-spectrum lamps and fixtures deliver superior color rendering and beam characteristics compared to others using LEDs created from non-native substrates.

Outline by Eureka

Outline brings a modern design sensibility to a broad family of luminaires, giving architects and lighting designers a design language that readily translates to a very wide range of spaces and applications.

Three different mounting types meet a wide variety of head number and arrangement options.

Advanced optics blend the light softly to create a more uniform and effective light beam. The lens enables quality illumination with a smooth cut-off.

New Products

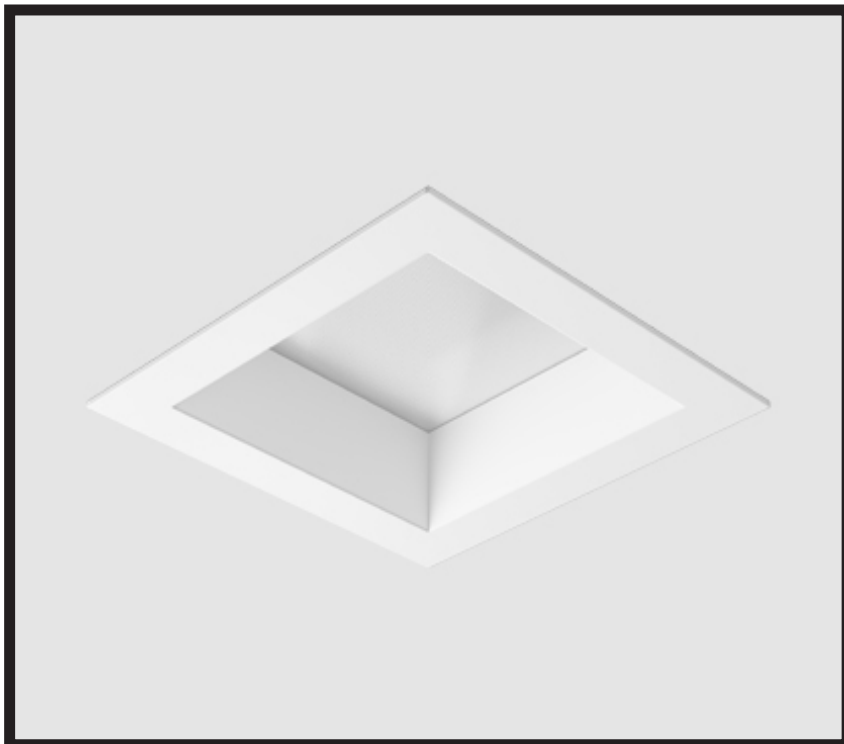

Faux Real by Bartco

Bring the outdoors in with the nature inspired fixtures of Faux|Real. Whether using natural wood or a simulated finish, each fixture can be customized to match your design aesthetic.

The Faux series of luminaires is comprised of architectural linear profiles finished with realistic imagery that makes the fixture appear to be made of natural wood. Nearly limitless custom options are possible, for simulating unique materials, branding reinforcement and interior design coordination.

The furniture grade wood cladding of the Real Series is available in five standard varieties with a hand applied natural finish.

4" Pro Series by Element

The Element 4" Pro fixed, adjustable and wall wash downlight series introduces a budget-friendly, specification-grade downlight with wide-angle distribution for commercial applications. Engineered with a precision diffuser and Solite soft focus lens that eliminates hot spots, direct visibility into the housing, and delivers a clean aperture and ceiling aesthetic.

The Element 4" Pro Series is offered in a variety of options, including Static White, Warm Dim or Tunable White to meet any commercial requirements.

New Products

Soft SQ by Beta Calco

The optically engineered diffuser throws the light downwards exactly where it is required, whilst creating a subtle indirect glow on the ceiling. Ideally suited for atriums, lobbies, boardrooms and reception areas.

Emergency option provides a 1.5 hour (3 hours for EU) emergency lighting facility. The remote system includes the inverter module, NiCad batteries and a remote wall/ceiling LED charge indicator and test switch (NA only). Maximum distance between wall/ceiling plate and luminaire is 25' (7.6m). Test switch fits a single gang box (not supplied).

ISO by Targetti

A new suspension light for the office and hospitality environments designed in close collaboration with Gensler. The union between two pure forms, the combination of the rectangular extrusion in parallel with the OPAL or UGR lens offer an architecturally interesting and visually comfortable luminaire that is both recognizable yet discrete. Available in standard size (83.15"L) suspended version with direct or direct/indirect optics.

The two different optical systems it can use – OPAL and UGR – make it suitable for installation in Office applications which are increasingly becoming open spaces, and in Hospitality projects which require not only visual comfort, but also attention to design and detail.

New Products

Odessa Gobo by Ligman

LIGMAN is delighted to launch our ground-breaking, affordable Gobo Projector version of the ODESSA 2. Designed to match and be interchangeable with the whole ODESSA 2 range, the ODESSA 2-G fixture utilizes the same rear casting and mounting options as its standard counterpart, maintaining the IP-66 rating and finish options, but we have designed a completely new tapered cast-aluminum front end around a new special 45W LED source which houses precise lens optics, a gobo holder rail system and three different focal lengths, offering Narrow, Medium and Wide beam options.

Wait, what is “QIP”?

Qualified Improvement Property (QIP) is the term used by the Internal Revenue Service to describe most interior property improvements made to a commercial building.

Why is it important?

QIP is a hot tax topic of conversation in the business world right now since the passing of the "Coronavirus Aid, Relief, and Economic Security Act" (CARES Act) in early April 2020 provided a much-needed change to QIP tax law. This change will result in big incentives to your customers who are looking to do renovations as it allows for an immediate tax deduction of 100% of the cost for many kinds of property improvements.

QIP Tax Law Updates

In attempt to keep you, our partners and family, connected and informed during these unknown times we wanted to share the latest in QIP. The passing of the CARES Act resulted in changes to the QIP tax laws. This change presents opportunities to your clients who are looking to do renovations with immediate tax deductions. Please contact us if you have any further questions, WE are HERE for YOU!
