PRODUCT UPDATES

SIGNAL PENDANT BY TECH LIGHTING

# New Products

## Renna Transitions by Peerless

Twist and turn through a design with Peerless® Renna™ - now available with sixteen transitions. And, with updates to the Modulus™ technology commissioning in the field is now possible.

New transitions include: straight twist, twisted left curve, twisted right curve, banked curve, mini curve 30, mini curve 45, banked curve, T corner, double curve, double banked curve and twisted double curve.

Updated Modulus firmware allows for commissioning of lit sections in the field and out-of-box operation: switch/occ/photocell control of entire fixture.

## Bellevue by Luminis

For projects requiring any combination of directional lighting, glare control in high traffic areas and street lighting, Bellevue delivers with a single, modern rectilinear design. An exterior space and landscape lighting multitasker that makes a strong, consistent design statement while offering all the functionality the space dictates.

Specifiers can choose between three unique optic types (Directional, Pedestrian and Street / Area) to address targeted lighting needs allowing the Bellevue aesthetic to be carried further into a project.

# New Products

## Motif by Luxxbox

Add a whole new dimension in lighting design - pattern. With Luxxbox's acoustic range already addressing light and sound, you can now add playfulness and personality to a space through pattern as well.

- Available on a range of PET colors with various ink options
- 3 Standard patterns in 4 colors for ease of specification
- Available on Linea, Blade, Dasch, Vapor Echo, Birdcage + Ac-Lipse

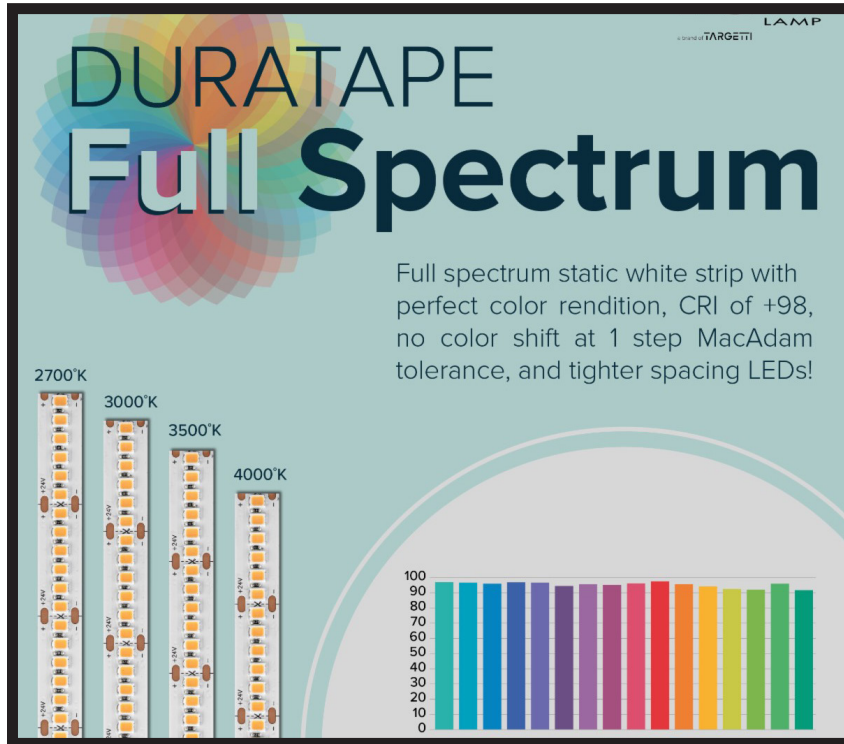

## ARC LED by Lithonia

The Lithonia Lighting® ARC family of LED wall-mounted luminaires combine visually comfortable illumination and architectural styling to create an affordable lighting upgrade.

- Clean look with no fins for a true architectural style that looks great on any building
- Recessed diffused lens minimizes high-angle light that can cause disability glare
- Built-in wet location wiring compartment for applications with no existing junction-box

## Duratape Full Spectrum by Duralamp

Using cutting-edge technology, DuraTape Full Spectrum allows for flawless color rendering in both indoor and outdoor applications. Ideal for art galleries and museums, this innovative tape has the ability to reproduce colors within the environment for a vivid application unlike other tape lights.

- Full spectrum static white strip with perfect color rendition
- CRI of 93+
- 1 step MacAdam tolerance
- Tighter spacing LEDs
- Available for indoor and outdoor applications

## Pavex by Kelvix

Introducing Pavex in-ground hardscape luminaires from Kelvix. Pavex features:

- 3 forms including Linear, Round and Square
- Perfect for Pavers, Gravel, Soil, Decks, Etc. (Not for Use in Concrete)
- Stainless Steel Housings
- Slip-Resistant Glass
- Drive-Over Rating
- High Impact Rated IK10
- Custom Sizes Available

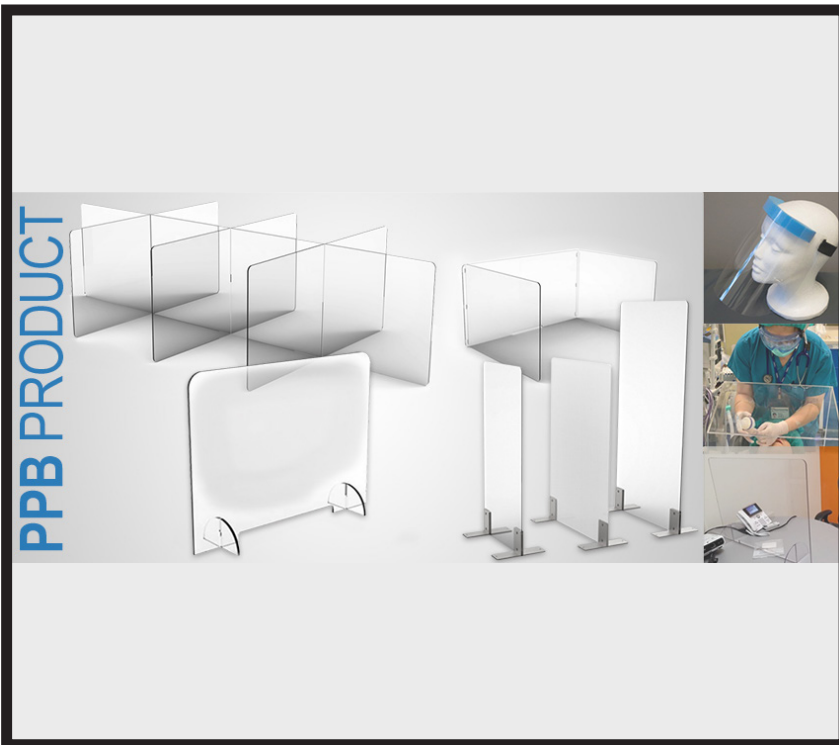

# New Products

## Knit by Eureka

Introducing Knit by Eureka. A soft outline and sound-absorbing, thermoformed construction give Knit an organic vibe. The felted texture of the pendant complements its generous, diffused light.

- Sound-absorbing recycled PET felt shade and rounded diffuser
- Optional uplight
- Distinctive power cable for a strong design note

## PPB Products from Sunoptics

Personal Protection Barriers (PPB) are designed to create a healthier work environment, by adding an additional layer of protection to reduce the spread of germs.

Using our expertise in molded plastics, US-based Sunoptics® now provides PPB product from clear-acrylic or polycarbonate desk dividers to portable sneeze guards and hospital face shields.

Key features of our PPB product include rounded corners for added safety, easy assembly, and portability. Our PPB product is easy to clean and disinfect.
