SpotLIGHT

Monthly Product Update:

Juno Firewall

These 4" downlights feature a patent pending integrated low smoke intumescent barrier making them ideal for use in multi-family, dorms, and assisted living facilities applications, or anywhere you need to meet fire-rated code compliance.

Luxxbox Flotte

The Flotte Lantern is an elegant pendant light that emits a soft, delicate white glow. Whether suspended in trees, along trellises, or lighting internal walkways, the sensual curve takes its cue from celebratory floating paper lanterns.

Beta Calco Triple

TRIPLE is a powerful but elegant pendant ideally suited for high performance applications. Available in 3 diameters: 6", 13" and 19". TRIPLE is designed to facilitate internal airflow to cool its components.

Eureka Mill

With its fifteen acoustic panels shade, Mill offers an original soft aesthetic and atmosphere enhancing functionality. With multiple sizes, colors and mounting options as well as optional uplight, Mill will help with volume control while adding a stunning design element to the decor.

LumenART K Series

Multiple simple and elegant form factors. Multiple finishes. Multiple CCT's. Lightweight concrete... and JA8? The K-series pendants by Lumenart check all of these boxes and MORE!

Selux BIOS

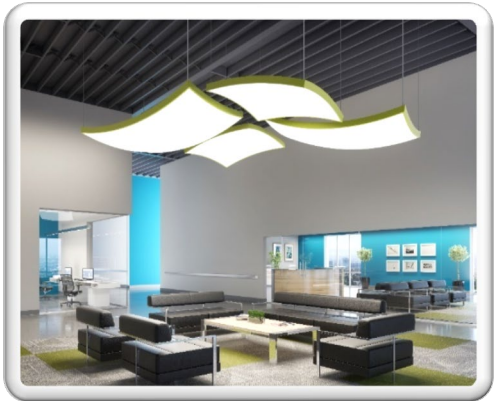

We are pleased to announce Selux is now offering several of their interior luminaires with Bios technology! BIOS® Sky-Blue® light-ing solu-tions create nat-ural sun-light by pro-vid-ing a spe-cific wave-length of light that stim-u-lates cir-ca-dian biol-ogy.

Erco Eclipse

One spotlight system, thousands of possibilities: with interchangeable low brightness lenses and a wide range of accessories. With only one light point and an almost invisible beam path, the new Darklight lenses have a unique appearance.

Peerless Venue

Specifically designed for open ceilings, Peerless® Venue™ blends a curved aesthetic with uniform illumination to define spaces where people gather, collaborate, and thrive.

Lithonia LDN Commercial Downlight is now SWITCHABLE!

- Round: 4", 6" and 8" / Square: 4" and 6"
- Downlight or Wall wash
- Clear, White or Black trim finish
- Glare control with deep source regression, 55° Distribution
- CEC T20 emergency options available
- Wet location, covered ceiling. Wall wash suitable for damp locations only.
- All-in-one 0-10V (127-277)/phase dimming (120V) 10% dimming driver std. (DALI 1% dimming driver also available)
- L70 / 50,000hrs

Switchable CCT's & Lumens

Lithonia CPX flat panel upgrades !!!

- **Factory-installed emergency battery pack** – Safe and easy! No need to order separately or spend time connecting on the job site
- **SensorSwitch™ JOT** – Wireless, single-room lighting controls that pair with 'Just One Touch' for dimming and occupancy sensing.
- **Prismatic A12 lens** - Choose this lens for even better glare control and the ability to match a fluorescent lensed troffer without a chunky fixture.
- **1'x4' Size Option** – A great solution for fluorescent wrap replacement* but also suitable for suspension, CPX now offers a 1'x4' in both static or switchable**

Available Switchable Color Temperature & Adjustable Lumens

CPX offers 2 switchable configurations (2'x2' and 2'x4') each with adjustable light output (ALO) for three lumen packages in one panel and switchable white (SWW) for three color temperatures in one panel.

- ✓ Distributors stock less SKU's and offer more configurations standard.
- ✓ Contractors have a 9x better chance they have what the customer needs and can make game time decisions on jobsite.
- ✓ Industry-leading LPW and standard high lumen outputs within the ALO/SWW configurations.

The diagram shows a perspective view of a square CPX flat panel light fixture. A red dashed line points from a circular inset showing a close-up of the ALO/SWW switch on the side of the fixture. The switch is a small, rectangular component with a sliding mechanism.

Controls Insider

The **nLight platform** continues to evolve! With this new technology advancement, nLight Air wireless technology is enhancing its ability to provide even greater range and reliability than before. Autonomous Bridging Technology allows networks to grow farther than ever and eliminates the guesswork in lighting control wireless designs. Utilizing the ability to “bridge” new groups of devices to the system controller by using devices that are already connected to it.

Power

Install JOT enabled fixtures and controls as instructed. No 0-10V wires needed!

Pair

Insert the pairing tool into the pinhole. Then, press and hold any button for 6 seconds. Once paired, each fixture will individually dim to 10% brightness.

Play

Products will be fully functional once all fixtures return to 100% brightness.

The **SensorSwitch JOT** (Just-One-Touch) enabled solution uses a one-of-a-kind wireless dimming technology for an effortless way to install and pair JOT enabled lighting fixtures and controls. Simplifying the installation and pairing process into 3 quick steps: Power, Pair and Play! This wireless technology works seamlessly for both new construction and renovation projects for single room spaces like private offices, conference rooms and classrooms.
