# NEW Product Update:

## OCL Petals Acoustic:

The NEW Petals Acoustic luminaire by OCL is inspired by the natural beauty and elegance of a flower in full bloom, Petals intentionally mimics the subtle nuance of real flower petals in sunlight with the way the light softly glows and gradates across the petals. Available in tunable white & RGBW and in diameters of 24", 36", 48", 60" and 72". The acoustic felt petals contain a minimum of 50% recycled plastic. Custom sizes, shapes, clusters and configurations are possible.

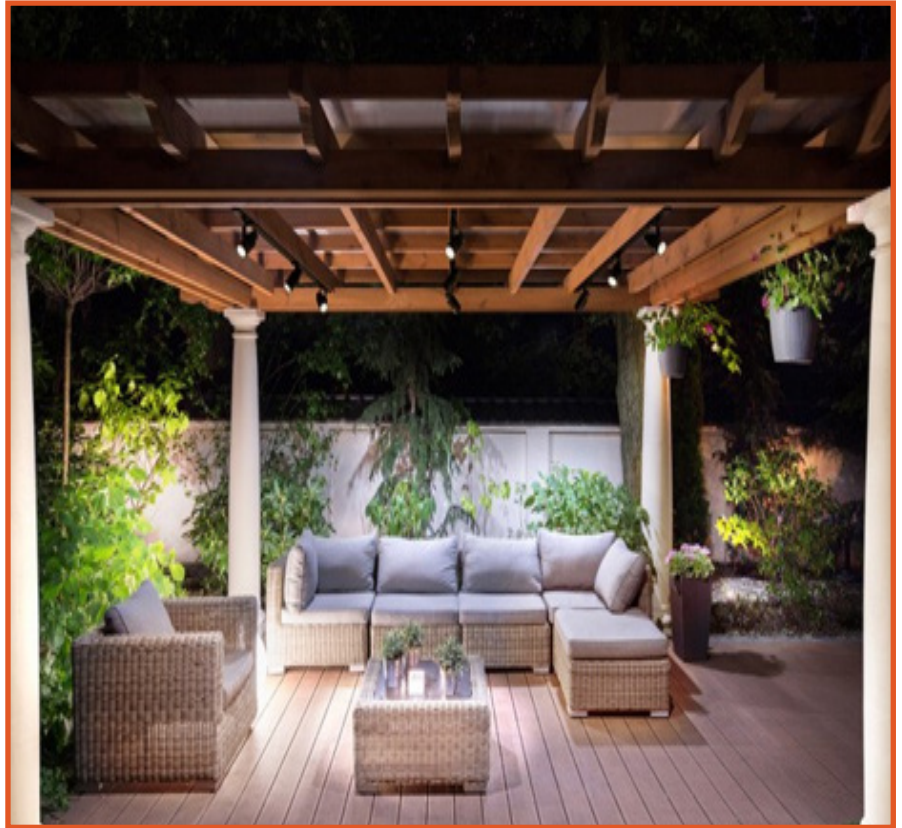

## Eureka Stella

"Stella, at its core, is a powerful light engine fused to a minimalist aluminum shell. A large diffusion dome hidden inside the shade create a uniform direct or direct/indirect illumination. A single cable or stem provides a minimalist look. A highly powerful COB type light source project a light, softened by a large polymer diffusion dome to create an illumination that is efficient & uniform. Some of the light is reflected upward by the dome; thus illuminating indirectly the ceiling. Many control options are available.

# NEW Product Update:

## PureEdge Outdoor Track:

The Outdoor Track by PureEdge Lighting brings the flexibility of 2-circuit track lighting to the outdoor environment. A powder coated, marine-grade finish allows for installation in the harshest salt-tinged near ocean locations. Utilizing 12VAC low voltage wiring removes the added need for conduit. The remote power supply is capable of feeding up to 300 Watts of lighting or a 40' length before re-feeding. The Micro Surface trak heads rotate 360 degrees and tilt 180 degrees allowing for targeted aiming.

## Luxxbox Vapor Echo:

Reduce ambient noise by up to 40% with Luxxbox Acoustic Lights. Made from recycled material, the Vapor Echo Acoustic Light turns open spaces into productive work zones by increasing comfort and concentration. Available in more than 20 different colors and 3 different sizes.

# NEW Product Update:

## **Luminis Color Tunable Luminaires:**

Luminis lighting has introduced color tunable luminaires for both the interior (lumistick series) and exterior (lumiquad series) environment. With over 16 million hues, lighting designers can utilize colored illumination to make a design statement, enhance building facades, or highlight specific landscaping features. There is also the opportunity to revert to white as required.

## **Juno Wafer Switchable:**

Provide a quality of light where you need it most. Wafer™ LED Downlights can provide even illumination throughout kitchen, living room garage, office and patio applications. The slim, housing-free design is available in 4" and 6" sizes and provides easy below the ceiling installation. The Wafer allows you to switch color temperatures from Soft White to Daylight. To adjust the color temperature, simply toggle the integrated switch to your desired setting and you are done!

# NEW Product Update:

## Healthcare Lighting:

EvoAIR UV™ delivers a modern approach to UV germicidal air room treatment. Engineered with advanced UV-C based pathogen control technology powered by

UV Angel Clean Air®. EvoAIR UV continuously circulates pathogen-contaminated air through a sealed chamber, treated with high-intensity UV-C light to inactivate bacteria, fungus, and viruses, and is then returned to room for a cleaner environment. Sealed UV air treatment chamber is integrated into a 2' x 4' illuminated troffer, allowing for use in occupied spaces. Up to 103 lumens per watt and available in 3000K, 3500K, 4000K and 5000K color temperatures.

Available for drop-in grid ceiling, recessed hard ceiling, surface mount or suspended installations.

# Controls Insider:

## nLight UNITOUCH (nPOD TOUCH):

The nLight UNITOUCH is our new and improved integrated touchscreen wall switch. The new 3.5" full-color responsive capacitive touch screen allows for a more simple and intuitive user interface with customizable screen saver images. It provides seamless control of multiple luminaires, shades, and devices on the nLight lighting controls platform through a single piece of glass, and wirelessly through the myPersonify mobile app. Blending modern design and an enhanced user experience, the nLight UNITOUCH is an elegant interface is ideal for any application!

## myPERSONIFY Mobile App:

With the new and improved nLight UNITOUCH comes the brand new myPersonify mobile app. This easy-to-use, intuitive tool allows for control of scenes, lighting, and shades directly from a mobile device via Bluetooth® low energy (BLE) technology. For today's occupants, the myPersonify app offers enhanced flexibility and the convenience of wireless control for nLight devices in the space they occupy. Currently available for both Apple® iOS and Google® Android associated devices.

# New Faces in Sales:
