LONG RANGE TRANSMITTER

LONG RANGE TRANSMITTER

PRODUCT OVERVIEW

The PixLite T8-S Mk2 is a pixel LED controller that's built to last and has all the protection one needs for peace of mind with professional installations

The PixLite T8-S Mk2 transmits up to 96 universes of data to 8 PixLite R2/R4 devices at distances up to 300m. Perfect for any professional installation, particularly when the LEDs will be seperated by some distance.

A CLOSER LOOK AT THE CONTROLLER

Art-Net

Supports Art-Net versions 1 to 4 for great compatibility with many lighting systems.

STREAMING ACN

E1.31 supports unicast and multicast traffioc. IGMP capability makes network setup for large sACN installations a breeze.

WIDE RANGE OF SUPPORTED PIXELS

Over 50+ protocols, including WS2801, WS2811/12/13/15/18, APA102/104, TM180x, SK6812/6822, MY9221/9231, plus many

See full list of pixel protocols here

FAULT PROTECTION

Features electrical fault protection on all differential data outputs, resulting in higher reliability and less equipment failures over time. See details on next page.

EXTREME FLEXIBILITY

Expanded mode option for data-only pixels offers twice as many digital outputs for faster refresh rates and greater flexibility. Clocked pixel types have adjustable speeds, allowing you to optimize refresh rate with cable length limitations. Advanced mapping options are available on every output: Null Pixels | Zig-zag | Reversing | Color Order | Pixel Grouping | Brightness Limiting.
