#### Field Convertible from Trimless or Millwork to Trimmed

Trimmed - B3SAF-FC1

Trimless - B3SAL-FC1

Millwork - B3SAM-FC1

usailighting.com/infinitecolormini

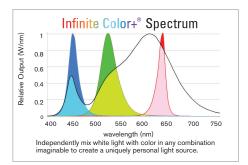

BeveLED Mini Infinite Color+ - the smallest member of our iconic BeveLED family to offer full color + tunable white light flexibility. Access to a wide variety of perfect architectural whites, saturated colors, neutrals, and pastels are possible with DMX controls. Infinite opportunities abound for residential, hospitality and retail lighting applications, and any project requiring full color and white light flexibility.

#### FEATURES

- · Full color and white light flexibility
- Dry/damp/wet location rated for showers
- · Field convertible from trimless or millwork to trimmed

#### **ADJUSTABLE PERFORMANCE DATA**

DELIVERED*	Infinite Color +			
PERFORMANCE:	White Light Channel Only	Multi Channel Output		
Wattage	17W	18W		
Source Lumens:	1100	1200		
Lumens Per Watt:	36	38		
Delivered Lumens:	625	675

# BeveLED Mini<sup>®</sup> Infinite Color+<sup>®</sup> - B3SA-FC1 3" Square Adjustable

#### **BEVELED MINI INFINITE COLOR+ SPECIFICATIONS**

#### FIELD REPLACEABLE LED LIGHT ENGINE

is serviceable through the aperture with a Philips screwdriver. All USAI Lighting light engines feature industry-leading color consistency.

#### **REMOTE LOCATION DRIVER**

BeveLED Mini Infinite Color+ is supplied with quick connects for use with remotely located driver. Driver is provided separately for remote location on site, enclosure to be provided by others. Remote dimming driver power supply option must be clearly specified in the "RP" table. Remote power supplies require enclosures by others that meet local codes and must be located in an accessible service panel within 100ft of the light fixture; see remote driver table below for coordination of enclosure sizes and wire gauges required. All dimming drivers comply with IEEE C62.41 surge protection.

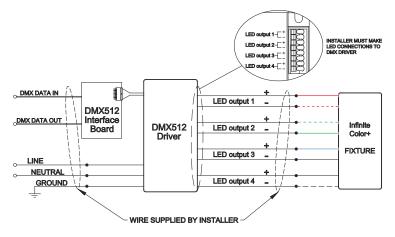

Notes

Remote Power Supply Requirements and Wiring Diagrams Note: Must be wired in homeruns per wiring diagram "A" below.

#### 1 Fixture Maximum Per Power Supply.

		Wire Gauge	Minimum Enclosure
<b>Remote Power Supply Dimming</b>	Option	Required*	Size Required (by others)
	1 EldoLED, 8 bit, DMX, 0.1%	18/16	9" W x 4"   x 2" H
UNV-D23	(2 EldoLED, 16 bit DMX, 0.1%	16/10	9 W X 4 L X 2 H

\* Wire gauge 18/16 = Maximum distance from light fixture to remote power supply is 100' using 16 gauge wire, 50' using 18 gauge wire.

**CABLING:** Data cables must be run in series between fixtures. Choose your preferred method of connection when specifying. To avoid signal transmission problems, a DMX link terminator should be used in the last fixture in a series on a given DMX bus. NOTE: Data communication cables and AC power lines must not be run in the same conduit.

• **RJ Cabling Option:** If the RJ cabling option is specified, the remote power supply is provided with a DMX interface board that has RJ45 jacks for data connection with CAT5 cable terminated with RJ45 connectors. A link termination dip switch is provided at the connector board; no separate link termination device is required.

• WR Cabling Option: If the WR cabling option is specified, the remote power supply is provided with a DMX interface board with terminal blocks for wires to be manually spliced for data connection. A link termination dip switch is provided at the connector board; no separate link termination device is required. The data cable used must meet the following requirements:

- type: shielded, 2-conductor twisted pair
- maximum capacitance between conductors: 30 pF/ft
- maximum capacitance between conductor and shield: 55 pF/ft
- maximum resistance: 0.02 ohms/ft
- normal impedance: 100-140 ohms
- conductive core: 24 AWG is recommended

NOTE: If 3-wire data cables are preferred, we suggest a Belden 9841 or equivalent cable which meets the specifications for EIA RS-485 applications. Do not use standard microphone cables: they cannot transmit DMX512 data reliably over long distances.

## BEVELED MINI INFINITE COLOR+ SPECIFICATIONS

#### HOUSING

All BeveLED Mini fixtures are field-flexible which allows for field changes from trimless or millwork to trimmed with a simple components change with parts from USAI. Housings are fabricated of 20 ga. steel construction and are supplied with quick connects and wire connections for use with remotely located driver. Driver is provided separately for remote location on site, enclosure to be provided by others.

Notes

#### MOUNTING

B3SAF overlap flange fixtures are designed for use in sheetrock, acoustical ceiling tile, and many other ceiling materials. B3SAL trimless fixtures are provided with a spackle collar and are designed for use in sheetrock/mud-in ceiling applications. B3SAM millwork fixtures are provided with a millwork collar and are designed for use in wood/millwork and stone construction applications. Butterfly brackets and adjustable nailer bars extendible from 14" to 24" centers with integral nails are provided for attachment to building structure. C-channel bars are optionally available for acoustical ceiling applications.

#### FIXTURE WEIGHT

FTA housing weighs 10 lbs. NC1, NCIC, and NCCP housings weigh 11 lbs.

#### WARRANTY

Based on IESNA LM80-2008, BeveLED has a 50,000 hour rated life at 70% lumen maintenance (L70). USAI Lighting Warranty covers replacement parts for 5 years from date of shipment. Ambient temperatures at fixture location should not exceed 40°C during normal operation.

#### **CEILING CUT OUT**

B3SAF Trimmed with Overlap Flange: 3-1/2" x 3-1/2" B3SAL Trimless Spackle-in: 4-1/16" x 4-1/16" B3SAM Millwork Knife-edge: 3-3/8" x 3-3/8"

#### LISTINGS

Dry/Damp/Wet location. AC and AB trim finishes are dry/damp only. . UL2043 rated for use in air handling plenums. NRTL/CSA-US tested to UL standards. IBEW union made.

#### NOTES

• Not for use in corrosive environment

Use of pressure washer voids warranty

#### PHOTOMETRICS

Consult factory or website for IES files. Tested in accordance with IESNA LM79.

## **IMPORTANT SAFETY INSTRUCTIONS**

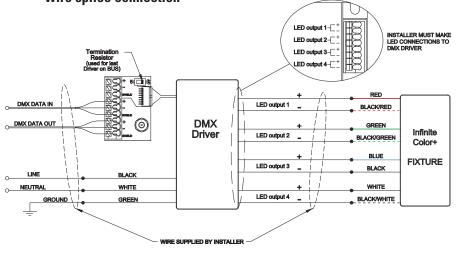

## SAVE THESE INSTRUCTIONS

- 1. Keep these instructions in a safe place for future reference.
- 2. Only qualified electricians in accordance to local codes should install these fixtures.
- 3. De-energize the electrical circuit at the circuit breaker prior to installation process or servicing.
- 4. Make sure all connections are in accordance with the National Electrical Code and any local regulations.

#### D23X1: EldoLED DMX dimming with manual addressing, 8-bit (Dims down to 0%) D23X2: EldoLED DMX dimming with manual addressing, 16-bit (Dims down to 0%)

#### WR CABLE OPTION wire splice connection

• WR Cabling Option: cables must be spliced connection. The data cable used must meet the following requirements:

- type: shielded, 2-conductor twisted pair · maximum capacitance between conductors:
- 30 pF/ft maximum capacitance between conductor
- and shield: 55 pF/ft
- maximum resistance: 0.02 ohms/ft • normal impedance: 100-140 ohms
- conductive core: 24 AWG is recommended

If 3-wire data cables are preferred, we suggest a Belden 9841 or equivalent cable which meets the specifications for EIA RS-485 applications. Do not use standard microphone cables: they cannot transmit DMX512 data reliably over long distances.

## USAI<sup>®</sup> Lighting Infinite Color+<sup>®</sup> IMPORTANT SAFETY INSTRUCTIONS

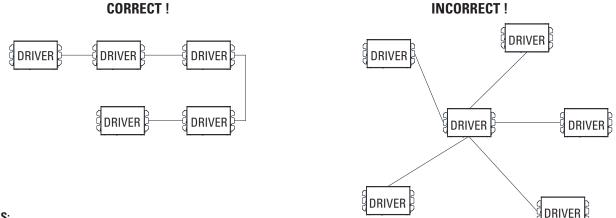

#### SAVE THESE INSTRUCTIONS

1. Keep these instructions in a safe place for future reference.

- 2. Only qualified electricians in accordance to local codes should install these fixtures.
- 3. De-energize the electrical circuit at the circuit breaker prior to installation process or servicing.

4. Make sure all connections are in accordance with the National Electrical Code and any local regulations.

#### DMX MUST BE DAISY CHAINED IN SINGLE LINE

#### NOTES:

1. Maximum distance from light fixture to remote power supply is 100' using 16 gauge wire, 50' using 18 gauge wire.

- 2. Minimum enclosure size required is 9"W x 4"L x 2"H. Enclosure supplied by others.
- 3. Remote Power Supplies can only be used with specific fixture types. Confirm power supply compatibility on light fixture label.
- 4. DMX signal cable must NOT be run in same conduit as high voltage AC power lines.
- 5. Remote Power Supplies must be daisy chained in one serial line using Data in and Data out
- 6. Maximum of 32 DMX devices on single DMX bus
- 7. Maximum of 1600' serial communication link distance
- 8. To avoid signal loss, DMX signal terminator should be used on last Remote Power Supply in line. This is provided through a dip-switch on the DMX512 interface board.
